Neither the issuer of the securities nor any of its affiliates prepared, provided, approved or verified any statistical or numerical information presented herein, although that information may be based in part on loan level data provided by the issuer or its affiliates. Investors are urged to read the base prospectus and the prospectus supplement and other relevant documents filed or to be filed with the Securities and Exchange Commission because they contain important information. Such documents may be obtained without charge at the Securities and Exchange Commission's website. Once available, the base prospectus and prospectus supplement may be obtained without charge by contacting Deutsche Bank at 1-800-503-4611. This communication does not contain all information that is required to be included in the base prospectus and the prospectus supplement. The information in this communication is preliminary and is subject to completion or change. The information in this communication supersedes information contained in any prior similar communication relating to these securities. This communication is not an offer to sell or a solicitation of an offer to buy these securities in any state where such offer, solicitation or sale is not permitted. You should consult your own counsel, accountant, and other advisors as to the legal, tax, business, financial and related aspects of a purchase of these securities.

The attached information contains certain tables and other statistical analyses (the "Computational Materials") which have been prepared by DBSI in reliance upon information furnished by the Seller. Numerous assumptions were used in preparing the Computational Materials which may or may not be reflected herein. As such, no assurance can be given as to whether the Computational Materials and/or the assumptions upon which they are based reflect present market conditions or future market performance. These Computational Materials should not be construed as either projections or predictions or as legal, tax, financial or accounting advice. Any weighted average lives, yields and principal payment periods shown in the Computational Materials are based on prepayment assumptions, and changes in such prepayment assumptions may dramatically affect such weighted average lives, yields and principal payment periods. In addition, it is possible that prepayments on the underlying assets will occur at rates slower or faster than the rates shown in the attached Computational Materials. Furthermore, unless otherwise provided, the Computational Materials assume no losses on the underlying assets and no interest shortfalls. The specific characteristics of the securities may differ from those shown in the Computational Materials by a permitted variance of +/-10%. The principal amount and designation of any security described in the Computational Materials are subject to a permitted variance of +/-10% prior to issuance. Neither DBSI nor any of its affiliates makes any representation or warranty as to the actual rate or timing of payments on any of the underlying assets or the payments or yield on the securities.

Transaction Overview (Cont.)	
<b>Collateral:</b>	<ul style="list-style-type: none"> <li>■ The mortgage loans (the “Mortgage Loans”) are 30 and 40 year adjustable rate loans secured by first liens on one-to four-family residential properties. The mortgage rates for the Mortgage Loans are generally fixed for an initial period from one, three, six or twelve months after origination. Substantially all of the mortgage loans are negative amortization loans with rates that adjust monthly and scheduled payments that adjust annually. At the end of the initial fixed-rate period, if any, each mortgage rate will adjust monthly based on the Mortgage Index plus the related margin. The “Mortgage Index” for the mortgage rates for the Mortgage Loans is the twelve-month average monthly yield on U.S. Treasury Securities adjusted to a constant maturity of one-year, as published by the Federal Reserve Board in the Federal Reserve Statistical Release “Selected Interest Rates (H.15)” (“One-year MTA”).</li> <li>■ For each of the One-year MTA indexed Mortgage Loans, the related borrower must make a minimum monthly payment which is subject to adjustment on a date specified in the mortgage note and annually on the same date thereafter, subject generally to the conditions that (i) the amount of the minimum monthly payment will not increase or decrease by an amount that is more than 7.50% of the last minimum monthly payment, (ii) as of the fifth anniversary of the first due date and on the same day every five years thereafter as well as the final payment adjustment date, the minimum monthly payment will be recast, without regard to the limitation in clause (i) above, in order to amortize fully the then unpaid mortgage loan principal balance over the remaining term to maturity, and (iii) if the unpaid mortgage loan principal balance exceeds 110% or 125% of the original principal balance due to Deferred Interest (the “Negative Amortization Limit”), the minimum monthly payment will be recast, without regard to the limitation in clause (i), in order to amortize fully the then unpaid principal balance over the remaining term to maturity.</li> <li>■ On each payment date after the initial fixed rate period, if any, the servicer will present to each borrower three payment options in addition to the minimum monthly payment described above. Those payment options will include (i) interest only, (ii) an amount that will fully amortize the mortgage loan over the remaining term of the mortgage loan at the current rate, and (iii) an amount that will fully amortize the mortgage loan over a period of 15 years from the first payment date at the current mortgage rate. Those payment options will only be available to the borrower if they are higher than the minimum monthly payment described above.</li> <li>■ Negative amortization on the One-year MTA Mortgage Loans will occur when the monthly payment made by the borrower is less than interest accrued at the current mortgage rate on the unpaid principal balance of the Mortgage Loan (such deficiency, “Deferred Interest”). The amount of Deferred Interest is added to the unpaid principal balance of the Mortgage Loan.</li> <li>■ As of the Cut-off Date, the aggregate principal balance of the Mortgage Loans is expected to be \$1,675,000,000, subject to a 10% variance. Approximately 24.36% of the Mortgage Loans do not have a prepayment penalty period. Approximately 26.66% of the Mortgage Loans have a prepayment penalty period of 1 year, approximately 11.28% of the Mortgage Loans have a prepayment penalty period of 2 years and approximately 37.70% of the Mortgage Loans have a prepayment penalty period of 3 years. The Group I Mortgage Loans will consist of Mortgage Loans with prepayment penalty periods of less than 3 years, the Group II Mortgage Loans will consist of Mortgage Loans with prepayment penalty periods of 3 years and the Group III Mortgage Loans will consist of Mortgage Loans with no prepayment penalties.</li> </ul>

For any Loan Group, any negative amortization in excess of principal collections for each such Loan Group ("Net Deferred Interest") shall be allocated among the Senior Certificates related to such Loan Group and the Subordinate Certificates based, in the case of the Senior Certificates, on the amount of interest accrued on such Class for the related Interest Accrual Period computed for this purpose in the case of the Class III-A-1-1 Certificates as though the Pass-Through Rate were subject to a cap based on the Group III Net WAC Cap Rate as long as the Class III-A-1-1 Swap Agreement remains in effect, and in the case of a Class of Subordinate Certificates, based on the interest accrued on the applicable portion of such Class for the related Interest Accrual Period.
